

ALUMINUM

3D & PICKET FENCE

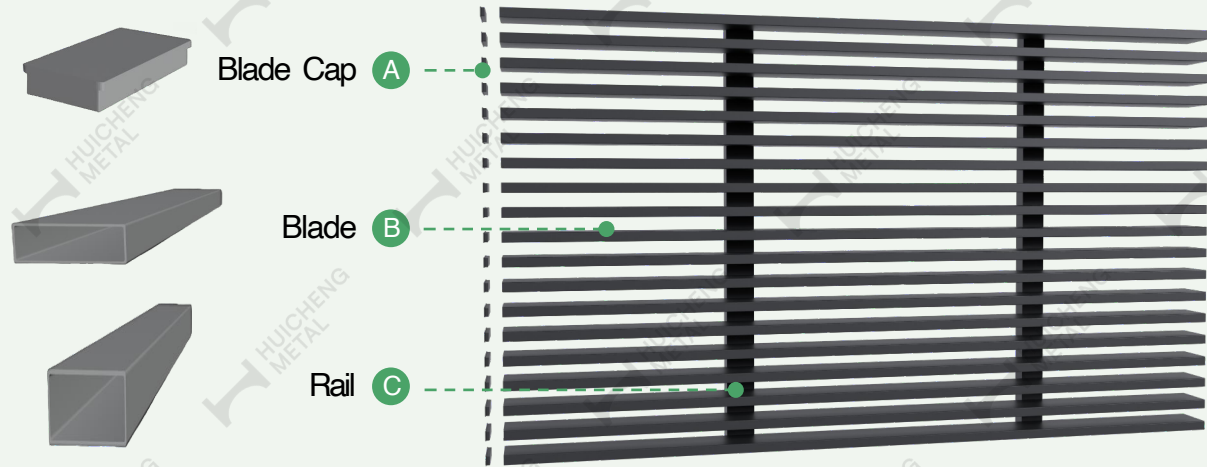

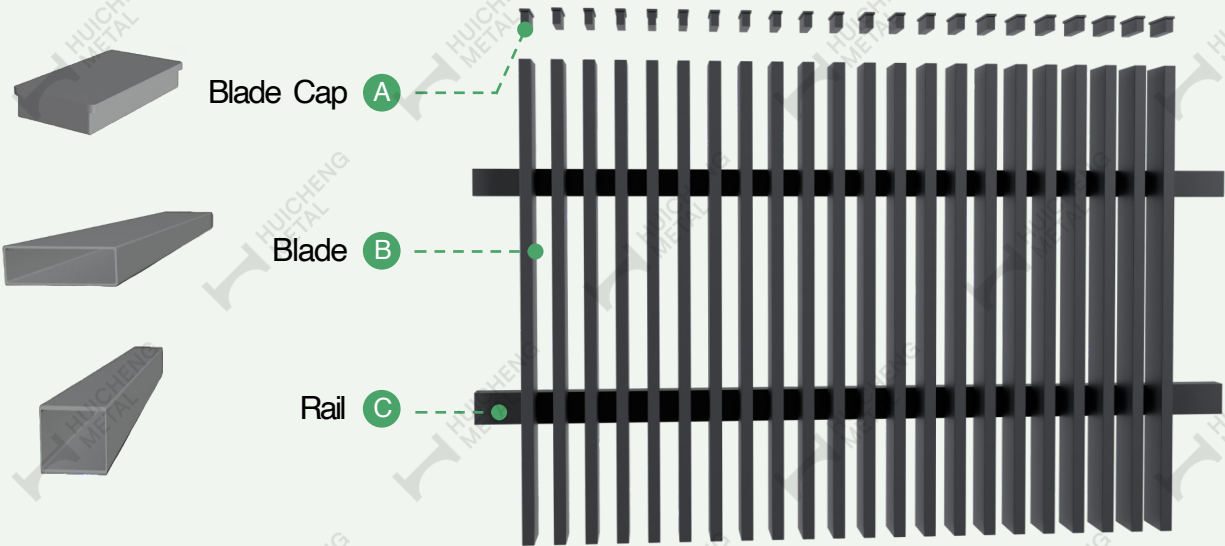

The elevation of fence and gate design to being an integral part of the overall aesthetic of the build is becoming more important. **Aluminum 3D Fence** is very popular in modern vertical builds. The lines add the perception of greater height and add visual flavour to what can be an otherwise featureless facade.

Timber pickets are slow to install because you have to cut and nail them on site. And then they need to be painted. **Aluminum Picket Fence** replicates this traditional look with a fully welded and powder coated aluminium fence panel system. It's fast to install.
