

ALUMINUM LOUVER FENCE

Benefits of LOUVER

Ventilation and airflow control: Louvres can provide natural ventilation by allowing fresh air to enter the building while also controlling the direction and amount of airflow.

Sunlight control: Louvres can help to control the amount of sunlight that enters the building, reducing the amount of heat and glare that can build up inside.

Security and privacy: Louvres can be designed to provide privacy and security for commercial buildings, restricting access to sensitive areas and preventing unwanted intrusion.
